

Use the 'counting on' method for subtraction

$$136 - 53 = \square$$

Jump to multiples of 10 to make it easier

Remember to start at the smallest number.

$$7 + 40 + 30 + 6 = \underline{\underline{83}}$$

Add together the jumps that you made

Find the difference

Use the partitioning method for addition

Partition the numbers into hundreds, tens and units

$$\begin{array}{ccccccc} \text{H} & \text{T} & \text{U} & + & \text{H} & \text{T} & \text{U} \\ 2 & 4 & 1 & + & 3 & 5 & 6 = \end{array}$$

$$500 + 90 + 7 = 597$$

Add the most significant digits first.

Recombine the numbers back together

Use the 'chunking up method' for division

$$135 \div 4 = \square$$

Don't forget to count any remainder

$$10 + 10 + 10 + 2 + 1 = 33 \text{ r}3$$

x 4 facts

$$1 \times 4 = 4$$

$$2 \times 4 = 8$$

$$5 \times 4 = 20$$

$$10 \times 4 = 40$$

Use easy times table facts to help you.

Add up how many 'lots of 4' you jumped.

Use the grid method for multiplication

$$136 \times 7 = \square$$

Partition the numbers in hundreds, tens and units

X	100	30	6
7	700	210	42

Make sure the numbers stay in the right place in the grid

$$700 + 210 + 42 = \underline{\underline{952}}$$

Recombine the numbers back together.
